Empathy Map

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	Marks 4

Empathy Map

This empathy map describes the ServiceNow IT support agent who manages incident records using Client Scripts and UI Policies. Client Scripts provide client-side form behavior, while UI Policies dynamically control field visibility, mandatory status, and read-only properties based on specified conditions. .

SAYS

- I need to create incident records accurately.
- Make important fields mandatory when required.
- Display relevant fields based on incident conditions.

.

THINKS

- Incident forms should be easy to use.
- Required information must be entered correctly.
- Client Scripts and UI Policies should work without errors.

.

HR / ADMIN USER

Employee Data( ) Manager

DOES

.• Creates and updates incident records.

.• Configures Client Scripts and UI Policies.

.• Tests field visibility and mandatory conditions.

FEELS

- Confident when incident forms work correctly.
- Concerned about incorrect field configurations.
- Relieved when data entry errors are reduced
