Customer Journey Map

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Journey Map

Map the incident reporter's experience stage-by-stage while creating, validating, and resolving incidents in ServiceNow, including actions, touchpoints, thoughts, feelings, process ownership, and improvement opportunities.

Phase of Journey	Stage 1:Incident Creation	Stage 2: Incident Validation	Stage 3: Incident Resolution
Actions *What does the customer do?*	• Open the Incident form. • Enter incident details. • Provide a short description.	• Submit the incident form. • Check validation alerts. • Correct missing information	• Review transformed employee data. • Verify records in Employee Test. • Check reports and dashboard results.
Touchpoint *What part of the service do they interact with?*	• Change the incident state to Resolved. • Enter resolution notes. • Submit the updated incident	• Client Script. • Validation alert. • Submit button.	• UI Policy. • State field. • Resolution Notes field.

Customer Thought *What is the customer thinking?*	• Have I entered all the required details? • Is the description clear?	• Why is the form not submitting? • Which information do I need to correct?	• Have I provided the resolution details? • Can I resolve the incident now?
