Data Flow Diagram

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Data Flow Diagram

Show how Incident data moves through the ServiceNow solution - from the Incident user, through Client Script and UI Policy validation and form controls, to the Incident record and resolution process.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	**External Entity**	A person or user outside the process who creates or updates an Incident record (e.g., Incident User, Service Desk User).
Rectangle with numbered header	**Process**	An activity that processes or validates Incident information using Client Scripts or UI Policies.
Rectangle (solid fill, no number)	**Data Store**	A place where Incident records and related information are stored for later use (e.g., Incident Table).
Labeled arrow	**Data Flow**	Incident information moves from the Incident User to the Incident Form, where UI Policies and Client Scripts control and validate the data before it is stored in the Incident Table. (**eg:** User enters Incident → Client Script validates → Incident saved.)

Project Data Flow

The diagram below shows the flow of Incident data, including form submission, UI Policy conditions, field visibility, mandatory and read-only controls, Client Script validation, Incident record creation or update, and resolution.
