Solution Architecture

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of the Incident Management solution, showing the ServiceNow user interface, Client Script, UI Policy, validation process, and Incident table where data is stored.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
Presentation Layer	Provides the user interface for creating, updating, and viewing incident records.	ServiceNow Web UI, Incident Form
Client Script Layer	Executes JavaScript on the client side to validate user input and display messages.	Client Scripts, JavaScript.
UI Policy Layer	Controls field visibility, mandatory status, and read-only properties based on specified conditions.	UI Policies, UI Policy Actions
Data Validation & Integrity	Ensures required fields are completed and prevents invalid form submissions.	Client-side Validation, Field Rules
Database / Reporting	Stores incident records and supports incident reports and dashboards	Incident Table, Reports, Dashboards
