Code-Layout, Readability and Reusability

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the structure, readability, maintainability, and reusability of ServiceNow Client Scripts and UI Policies configured for the Incident table. The solution uses organized scripts, field validation, conditional field visibility, mandatory field settings, and reusable form configurations.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform formatting is maintained across scripts and configurations.	Yes	Consistent naming and formatting are used.
2	Proper File Structure	Client Scripts and UI Policies are logically organized.	Yes	Incident form configurations are maintained separately.
3	Meaningful Variable Names	Variables clearly describe their purpose.	Yes	Descriptive variables such as priority and state are used..
4	Function / Method Names	Functions clearly describe their actions.	Yes	Functions such as onChange() and onLoad() are used appropriately.
5	Code Comments	Comments explain important script logic.	Partial	Key logic is documented; additional comments can improve clarity.
6	Modular Design	Scripts and UI Policies are maintained as separate components.	Yes	Field validation and form behavior are handled independently.
7	No Redundant Code	Duplicate logic and unnecessary configurations are avoided.	Yes	UI Policies handle simple field behavior without unnecessary scripts.
8	Error Handling	Invalid or incomplete field values are handled appropriately.	Yes	Client-side validation helps prevent incorrect form entries.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technolog	yWhere Reused	Reusability Level (High / Medium / Low)
1	Client Script	JavaScript / ServiceNow	Incident form validation	High

2	UI Policy	ServiceNow	Conditional field visibility and mandatory settings	High
3	On Load Client Script	JavaScript	Initial form behavior	Medium
4	On Change Client Script	JavaScript	Field value change validation	High
5	UI Policy Actions	ServiceNow	Show, hide, or make fields mandatory	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Scripts and UI Policies are organized clearly.
Readability	4	Meaningful field names and simple logic improve readability.
Reusability	5	Client Scripts and UI Policies can be reused for different Incident form requirements.
Documentation / Comments	4	Configuration details are documented; additional comments can improve maintainability
Overall Score	4.25	The solution uses structured Client Scripts and UI Policies to manage Incident form behavior efficiently.
