No. of Functional Features Included in the Solution

Date	03 October 2026
Team ID	SWTID-2026-3644
Project Name	Import Data Using Transform Maps (Spreadsheets)
Maximum Marks	Marks 5

:Functional Features Overview

This document lists the functional features included in the **Implement Client Script & UI Policy (Incident)** solution.

Each feature describes its purpose, ServiceNow component, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Componen t	Status Done / In Progress( ) Pending /	Marks Contribution
1	Incident Form Preparation	Create and configure the Incident form with the required fields for implementing client-side behaviour .	Incident Form	Done	0.5
2	Client Script Creation	Create a Client Script to implement client-side logic and automatically control Incident form behavior based on field values .	Client Script	Done	0.5
3	Field Value Validation	Validate Incident field values on the client side and provide appropriate messages or actions when required conditions are not satisfied.	Client Script / Validation	Done	0.75
4	UI Policy Creation	Create a UI Policy to dynamically control the Incident form based on specified conditions.	UI Policy	Done	0.75
5	Field Visibility & Mandatory Control	Make selected Incident fields visible, hidden, mandatory, or non-mandatory according to the defined UI Policy conditions.	UI Policy Actions	Done	0.75
6	Dynamic Form Behaviour	Apply client-side changes dynamically when Incident field values are changed, without requiring the form to be reloaded.	Client Script / UI Policy	Done	0.75
7	Incident Testing & Verification	Test the Client Script and UI Policy with different Incident field values and verify that the expected form behavior is achieved.	Incident Test Form	Done	0.5
8	Error Handling & User Guidance	Display appropriate messages and guide users when invalid or incomplete Incident information is entered.	Client Script / Form Messages	Done	0.5

:Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Incident Form, Field Visibility, Mandatory / Non-Mandatory Controls
2	Backend / Logic	3	Client Script, Field Validation, Dynamic Form Behaviour
3	Database / Storage	0	-
4	API / Integration	-	-
5	Security / Authentication	-	-

:Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	6
Additional / Nice-to-Have Features	— 2— Error Handling & User Guidance, Testing & Verification
Features Tested&Verified	8
